

SAGAR RAMESHBHAI SONARA

Python Developer | Backend & API Engineering | Ahmedabad, India
+91 78019 50401 • sagarsonara2143@gmail.com • linkedin.com/in/sagarsonara

PROFESSIONAL SUMMARY

Results-driven Python Developer with 3+ years of experience building scalable backend systems, RESTful APIs, and enterprise-grade web applications. Strong expertise in Django REST Framework (DRF), FastAPI, Flask, PostgreSQL, MySQL, and MongoDB. Hands-on experience with multi-tenant SaaS architecture, Stripe payment integration, subscription management, process automation, web scraping, and third-party integrations. Skilled in JWT-based authentication, Role-Based Access Control (RBAC), Celery/Redis task queues, and Docker-based deployments. Currently building DwERP — a multi-tenant ERP for the fenestration industry — and delivered Morinox, a UK-based service platform with commission and subscription systems.

TECHNICAL SKILLS

Languages & Frameworks	Python, Django, Django REST Framework (DRF), FastAPI, Flask, React.js (Basic)
Databases	PostgreSQL, MySQL, MongoDB Stored Procedures, Indexing, Query Optimization
Architecture & Security	RESTful APIs, Multi-Tenant SaaS, JWT Authentication, RBAC, Stripe Payment Integration
AI / Computer Vision	OpenCV, Face Recognition, Speech-to-Text (STT), Text-to-Speech (TTS)
Data & Scraping	Pandas, NumPy, BeautifulSoup, Scrapy, Selenium, Requests
Task Queues & Caching	Celery, Redis, Multithreading, Multiprocessing
DevOps & Deployment	Docker, NGINX, Cloudflare, NSSM, Linux
Tools & Platforms	Git, GitLab, GitHub, Bitbucket, Jira, Postman

WORK EXPERIENCE

Python Developer MSBC Group India Pvt Ltd, Ahmedabad	Jan 2026 – Present
- Developing and maintaining DwERP, a multi-tenant ERP platform for the fenestration industry (windows, doors, facades) supporting concurrent tenant data isolation and custom configurations. - Built Morinox — a UK-based service provider platform — managing Users, Customers, and Engineers with role-based access, commission tracking, subscription plans, and Stripe payment integration for seamless billing. - Designing scalable backend modules using Django REST Framework (DRF) and PostgreSQL; implementing schema-based and row-level multi-tenancy patterns. - Exposing RESTful APIs for core ERP modules: inventory, production planning, order management, and customer/vendor management. - Implementing JWT-based authentication with tenant-aware RBAC, ensuring secure and isolated multi-tenant access. - Writing complex PostgreSQL queries, stored procedures, and index optimizations to support high-volume transactional ERP operations. - Collaborating with cross-functional teams to translate fenestration-domain business requirements into robust backend solutions.	
Software Developer Cognisun Infotech Pvt Ltd, Ahmedabad	May 2024 – Dec 2025
- Designed and developed RESTful APIs using FastAPI and Flask, enabling secure services supporting 1,000+ concurrent users. - Built task & project management systems, email/WhatsApp schedulers, and OCR-based tools — automating daily operations and reducing manual workload by 60%. - Optimized MySQL queries and indexing strategies, achieving 40% faster API response times on data-heavy endpoints. - Developed reusable modules with JWT authentication and RBAC, improving code reusability and maintainability across multiple projects. - Deployed applications on Windows using NSSM, NGINX, and Cloudflare — ensuring 99.9% uptime with SSL-secured access. - Mentored 3 junior developers and interns through code reviews and best-practice sessions, improving overall team delivery efficiency.	
Python Developer X-Byte Enterprise Crawling, Ahmedabad	Jul 2023 – Apr 2024
Built robust web scraping pipelines using BeautifulSoup, Scrapy, and Selenium to extract 100,000+ records from e-commerce and business directory websites.	

- Implemented anti-bot bypass strategies (proxy rotation, CAPTCHA handling, user-agent spoofing) — increasing scraping success rate by 80%.
- Automated data cleaning and transformation workflows using Pandas, reducing post-processing effort by over 50%.

Python Developer Intern | Tops Technologies, Ahmedabad

Feb 2023 – Jun 2023

- Developed real-world mini projects using Python and Django, establishing core backend development fundamentals.
- Practiced Agile methodologies within team-based projects, contributing to sprint planning and code reviews.

KEY PROJECTS & IMPACT

Morinox – UK Service Provider Platform

[MSBC Group](#) | [DRF](#), [PostgreSQL](#), [Stripe](#), [RBAC](#), [Subscription Management](#)

Built a service platform managing Users, Customers, and Engineers with role-based permissions. Implemented Stripe payment integration supporting commission-based payouts and flexible subscription plans — enabling automated billing and real-time payment tracking.

DwERP – Multi-Tenant Fenestration ERP

[MSBC Group](#) | [DRF](#), [PostgreSQL](#), [Multi-Tenancy](#)

Enterprise ERP for the fenestration industry supporting multi-tenant isolation, production workflows, inventory management, and customer-vendor operations.

Order Management System

[Cognisun Infotech](#) | [FastAPI](#), [MySQL](#), [PDF Generation](#), [Celery](#)

Role-based system managing quotations, invoices, and deliveries with automated PDF generation and email alerts — reducing manual follow-ups by 70%.

Task & Project Management System

[FastAPI](#), [MySQL](#), [Celery](#), [Redis](#)

Centralized real-time task tracking, user assignments, and status updates with automated monthly and project-wise timesheet generation.

API-Based User Role Management System

[Cognisun Infotech](#) | [Flask](#), [FastAPI](#), [JWT](#), [RBAC](#)

Secure RESTful APIs with JWT authentication and permission control, streamlining access management and reducing redundant authorization logic across modules.

Automation & Scheduling Engine

[Celery](#), [Redis](#), [FastAPI](#)

Full-featured scheduler supporting one-time and recurring (daily/weekly/monthly) events with reliable execution guarantees.

Attendance Module with Face Recognition

[OpenCV](#), [Face Recognition Library](#)

Real-time attendance system achieving 90%+ accuracy in varied lighting conditions using OpenCV and face recognition algorithms.

Google Maps & Drive Integration

[Google Maps API](#), [Google Drive API](#), [Python](#)

Scraped and structured business data via Google Maps APIs with automated backup to Google Drive for reliable data archiving.

EDUCATION

Bachelor of Computer Applications (BCA) — JG College of Computer Application

2017 | Distinction – 72%

Higher Secondary (12th) – Science — GHSEB

2014 | 74%

Secondary (10th) — GSEB

2012 | 71%
